Introduction and Background

The Food and Nutrition Security Policy (2013) identifies immediate and underlying causes of malnutrition as multi-factorial. In relation to this, the Multisectoral Food and Nutrition Security Strategy(MFNSS) (2023-2025) was developed with specific goals and objectives to implement an integrated approach to food and nutrition security. As part of this, the Government of Zimbabwe also adopted the Food and Nutrition Security Committees (FNSCs) as the vehicle for implementation of integrated food and nutrition interventions.

The FNSCs prepare, implement, monitor, and evaluate a coordinated food and nutrition improvement plan. Having successfully piloted the Multi-Sectoral Community Based Model approach in the 4 pilot districts, and upscale to 42 districts, guidelines have been developed to enable the scale up of the approach across the country. Furthermore, all 60 Districts in the country have been capacitated on their operational mandate. These capacity building initiatives provide a broad framework within which districts can address context specific food and nutrition issues.

This report summarizes the District Food and Nutrition Security Committees 2024 priority actions to help the various departmentscoordinate their inputs ands budget for and manage assigned tasks for collective impact on Food and Nutrition Security (FNS).

Broad Objective

The DFNSCs, following their mandate to coordinate food and nutrition activities, by analyzing the regular nutrition-related data/information, reviewing the local food & nutrition situation and based on the appropriate and maximum utilization of available resources prepared an annual coordinated food and nutrition plan for their individual district.

It is expected that, by following the proper process and through discussion in the meetings of the committee, opportunities may be analyzed and reviewed against the local food and nutrition situation, current nutrition activities, and present gaps, all the participants from government and non-governmental organizations will properly understand and realize the needs for preparing a data-information based realistic coordinated plan of action for food & nutrition and at the same time their own leadership, role or tasks.

Process

The Food and Nutrition Council held a virtual planning meeting at which DFNSCs presented their coordinated annual plans.

For preparing a coordinated annual plan of action for food and nutrition, the chairpersons of the DFNSCs instructed all the members of the committee (especially agriculture, health and nutrition, Water Sanitation and Hygiene, Education, Youth, Women Affairs the departments relating to education and social safety-net) by using the specific template for analysis of the current activities of their own sector, gaps and possible resources and opportunities that could play a role in improving food and nutrition security. Each sector submitted their individual food and nutrition plan to the secretariat for collation within stipulated time.

The following Districts did not submit their information on DFNSC Work Plan:

Mash Central – Mazowe

Mash East – Seke, Mudzi, Uzumba Maramba Pfungwe

Masvingo – Mwenezi

Mat South – Matobo

Midlands – Gokwe South
