Introduction and Background

The Food and Nutrition Security Policy (2013) identifies immediate and underlying causes of malnutrition as multi-factorial. In relation to this, the Multisectoral Food and Nutrition Security Strategy(MFNSS) (2023-2025) was developed with specific goals and objectives to implement an integrated approach to food and nutrition security. As part of this, the Government of Zimbabwe also adopted the Food and Nutrition Security Committees as the vehicle for implementation of integrated food and nutrition interventions.

This report summarizes the PFNSCs 2024 priority actions to help the various departments to coordinate their inputs as well as budget for and manage assigned tasks for collective impact on Food and Nutrition Security (FNS). However, there are huge gaps in PFNSC functionality that include attrition of members, resource constraints and sporadic meetings. As such, PFNSC work plans reflect commitment from core members (Agriculture, Health, Social Service and Local Government). The FNC is making efforts to ensure that PFNSCs are capacitated to the level of functionality that is expected of them for example holding quarterly PFNSC Virtual Meetings and finalization of the training package.

Broad Objective

The PFNSCs, following their mandate to coordinate food and nutrition activities, by analyzing the regular nutrition-related data/information, reviewing the local food & nutrition situation and based on the appropriate and maximum utilization of available resources prepared an annual coordinated food and nutrition plan for their individual district.

It is expected that, by following the proper process and through discussion in the meetings of the committee, opportunities may be analyzed and reviewed against the local food and nutrition situation, current nutrition activities, and present gaps, all the participants from government and non-governmental organizations will properly understand and realize the needs for preparing a data-information based realistic coordinated plan of action for food & nutrition and at the same time their own leadership, role or tasks.

Process

The FNC held a PFNSC virtual planning meeting on 31 January 2024. It was attended by all 8 Rural Provinces and 1 Urban Province (Bulawayo). Each province was represented by Chair/Co-Chair, Secretariat/Convener, and any PFNSC members from Women Affairs, Education or any other sector.

Bulawayo Metropolitan Province Provincial Food and Nutrition Security Committee (PFNSC) 2024 Priority Plans
